

Anglia Ruskin
University

Entrepreneurship
Support Programme:
**Starting up in...
Engineering**
25 November 2014

Where:

Anglia Ruskin University
Chelmsford Campus
Marconi Building
Room Mar001

Cost: FREE

**Book to attend
at Eventbrite:**
[gettingstartedin.
eventbrite.co.uk](http://gettingstartedin.eventbrite.co.uk)
or visit anglia.ac.uk/esp

**Where can
engineering
take you?**

Q A

What makes an engineer a brilliant engineer? Creativity, innovation and practicality.

Come to our FREE seminar, where technology entrepreneurs will tell us their own stories about what it was like for them starting out, the challenges they faced, and the problems they overcame to be the success they are today.

They will give advice and tips on how to start out in engineering, the skills and knowledge you need and how to get where you want to be.

You will also be able to put your questions to them at a panel debate at the end of the session, as well as speaking to them during the networking session, over a drink.

Registration: 17.30

Start: 18.00

Finish: 19.30, followed by networking and refreshments.

Book your place at Eventbrite:
[gettingstartedin.eventbrite.co.uk](https://www.eventbrite.co.uk)
or visit anglia.ac.uk/esp

Speakers:

Meir Greenfeld, Chief Engineer, Aker Solutions

Pawel de Sternberg Stojalowski, Managing Director, R&D Engineer and Consultant for Decontamination of Medical Devices, Aseptium

Hillary Taylor, Consultant, specialising in business and operations development, including risk analysis and mitigation (dependency modelling)

In partnership with Chelmsford Engineering and Innovation Community, a local informal group of engineers, technological entrepreneurs, academics and others interested in engineering in all its forms. Join CEIC to meet other professionals from various engineering disciplines:
